

JBL TT350 Classic

Turntable – Walnut

JBL

Get intimate with your record collection with the JBL TT350 Classic. With a solid walnut clad plinth, heavy aluminum platter and curved aluminum tonearm, the TT350 Classic is testimony to the joy of music and vinyl records.

The Direct Drive motor ensures your records are played in perfect time with powerful dynamics at 33.3 rpm for LPs and 45 rpm for EPs and singles. Rotational speeds are locked with a speed sensor for perfect pitch.

The tonearm features a high-quality moving magnet cartridge pre-installed on a removable head shell for easy replacement and upgrade. The vertical tracking angle (VTA) is adjustable to allow for larger or smaller cartridges when upgrading.

The feet are damped to reduce vibration ingress to the record, and adjustable to allow the TT350 Classic to be positioned on uneven surfaces.

Highlights:

- Solid Natural Walnut veneered plinth with JBL Classic styling
- Heavy Aluminum platter with Direct Drive motor for locked in timing, pitch and dynamic sound
- Aluminum S-shaped tonearm with removable head shell and VTA adjustment for easy cartridge upgrades
- 33.3 and 45 rpm selectable
- Audio Technica Moving Magnet Cartridge pre-installed and aligned

Specifications:

Type:	Turntable
Plinth Materials:	Natural Walnut veneered solid MDF with machined Aluminum front panel
