airstream s200

AirPlay® Sound System

MONITOR AUDIO

The S200 has been designed primarily for situations where space is at a premium. With compact, upright styling and a small footprint of just 12 x 12cm the S200 can be positioned discreetly on any shelf, table top or work-space.

At the heart of the S200, a gold dome C-CAM® tweeter is flanked by dual 3" C-CAM metal cone bass drivers to deliver incredible clarity and precision to any kind of music content. Augmented by a 'race-track' design ABR (Auxiliary Bass Radiator) mounted on the back; bass is tight, punchy and reaching down far beyond what could be expected from such a diminutively proportioned speaker. The bass/mid drivers have been specially designed to work with a cleverly angled baffle and digital signal processing (DSP) to create a much wider sound-field. This ensures music can be enjoyed anywhere in the room and not just the 'hot seat' position.

Three separate class-D amplifiers deliver a total of 65 watts to bass and tweeter drivers, ensuring the S200 can deliver more than enough level to fill a moderate room size. Each bass driver is driven separately using the stereo channels to ensure the best possible fidelity and results in more dynamic and powerful character. Our clever DSP is at work constantly monitoring signal and power levels to ensure maximum power can be delivered with extremely low distortion.

The S200 is able to play almost any music format from a multitude of devices. Bluetooth is added to provide flexibility and easy streaming from any kind of mobile device, whether it's Android, Apple or Windows phone. aptX is also added for support devices to provide much higher 'CD like' quality.

FEATURES AT A GLANCE >

Multi-Zone wire-less stereo speaker system **/** Apple AirPlay® **/** Airstream Direct – Stream music directly without a Wi-Fi router **/** Bluetooth 4.0 with aptX® - Adds high performance 'CD like quality' audio playback **/** Fuss free installation **/** Cleverly angled drivers create a larger listening area **/** High resolution DAC **/** 65 watts of total power amplification **/** Inputs; USB input for charging, Music Playback and Wi-Fi set up (Apple iOS) & 3.5mm Auxiliary input Jack for T.V, radio or other portable devices **/** Wall Mounting Option **/** Monitor Audio designed DSP (Digital Signal Processing) **/** Automatic Firmware upgrades via Wi-Fi

AirPlay provides the perfect compatibility with Apple iOS mobile devices, PC or MAC running iTunes. The ability to stream uncompressed ALAC (Apple lossless) file format, is a real benefit for even higher resolution. The S200 can be connected to a Wi-Fi network and utilise the traditional AirPlay method, or use the Airstream direct mode to connect your device directly without the need of a network. Extending compatibility further, DNLA has been implemented to provide streaming from a network store such as PC or NAS drive, or wherever you choose to store your music. DLNA allows streaming of multiple file formats including the popular uncompressed FLAC format

iOS devices can be plugged in to the S200 directly using the USB charge cable for playback and charging requirements, as well as the simple Wi-Fi sharing set up method.

A 3.5mm stereo jack provides legacy support for devices which only have a headphone or analogue audio output. Constructed from a high tech mineral filled polymer material, excellent rigidity and acoustic damping properties have been achieved to further enhance sound quality. The toughened glass top trim affords a classy, designer appearance whilst being scratch resistant and durable. Side mounted volume and input selection buttons allow easy access to change device streaming.

With a choice of white or black finish options, the elegantly styled S200 blends with any room décor and furnishings. It can also be wall mounted easily using the integrated mount point, offering limitless installation possibilities around the home. The S200 is compatible with our MASMs (MA Speaker Mounts), our simple and elegant 1/4" UNC wall mounting kits.

SPECIFICATIONS >

Frequency Response	80Hz – 25KHz
Maximum SPL	101 dBA (both channels driven at 1W@1m)
Power Output	Bass: 2 x 25 Watts / Tweeter: 15 Watts
Driver Complement	2 x 3" bass drivers with C-CAM metal cone technology 1 x 20mm Gold C-CAM dome tweeter
System Configuration	'Race-track' profile ABR (Auxiliary Bass Radiator) rear mounted
Auxiliary Input Impedance/Sensitivity	10K Ohms/ 300mV
Signal to Noise SNR	94dB
A.C Input Voltage	90-264v (auto-range)
Amplifier Category	Class D
Power Consumption	0.3 Watts (standby)* 70 Watts Maximum
Models Supported * AirPlay works with devices running iOS 4.3.3 or later.	iPhone 5s, iPhone 5c, iPhone 5, iPhone 4S, iPhone 4, iPhone 3GS, iPhone 3G, iPhone, iPod touch 4G, iPod touch 3G, iPod touch 2G, iPod touch, iPod nano 7G, iPod nano 6G, iPod nano 5G, iPod nano 4G, iPod nano 3G, iPod nano 2G-with iOS 4.3.3 or greater.* PC or MAC running iTunes 10.2.2 or greater
Supported File Formats AirPlay Airstream	AAC, ALAC, MP3 AAC, ALAC, MP3, FLAC
Bluetooth Version	4.0 with aptX support.
Wire-less Network Protocol	802.11 b/g
Colour/ Finish	Charcoal Grey with Black grille cloth White with light Grey grille cloth
Weight	2.26Kgs (5lbs)
Approvals	ETL/ CE/ Fcc/CB/ Erp/ Wi-Fi/ Wi-Fi WMM/ Bluetooth/ Apple MFi Certified.
