MXN10

COMPACT SIZE, MASSIVE CHOICE

GREAT BRITISH SOUND SINCE 1968

Compact Size, Massive Choice

Our MXN10 network player can breathe new life into a much-loved set-up – opening you up to a whole world of Hi-Res music. Its half-width compact footprint offers flexibility of placement. MXN10 can access stacks of free services, like internet radio, as well as the well-known premium ones – many offer free trials, so you can pick a favourite. It will play Hi-Res music from USB sticks and NAS drives too. That's digital music from a variety of sources, all conveniently controlled by our intuitive StreamMagic app on your mobile phone.

Over a Decade of Streaming Know-How

MXN10 runs off our latest StreamMagic Gen 4 module and software. It's a system that we developed ourselves in London for no-compromise, rock-solid, hi-fi music streaming. It's easy to use and is capable of playing music with incredible clarity – up to both 768KHz 32bit PCM and DSD512 (it's all you'll need!)

Now in its 4th generation, the StreamMagic module (a Quad core ARM Cortex-A53 1.8GHz) is constantly updated to support the latest advances in audio formats and streaming service features. StreamMagic has also seen 14,300 Android and 18,500 iOS app downloads in 2021.

Audio Xpress, USA

Ready for the Revolution?

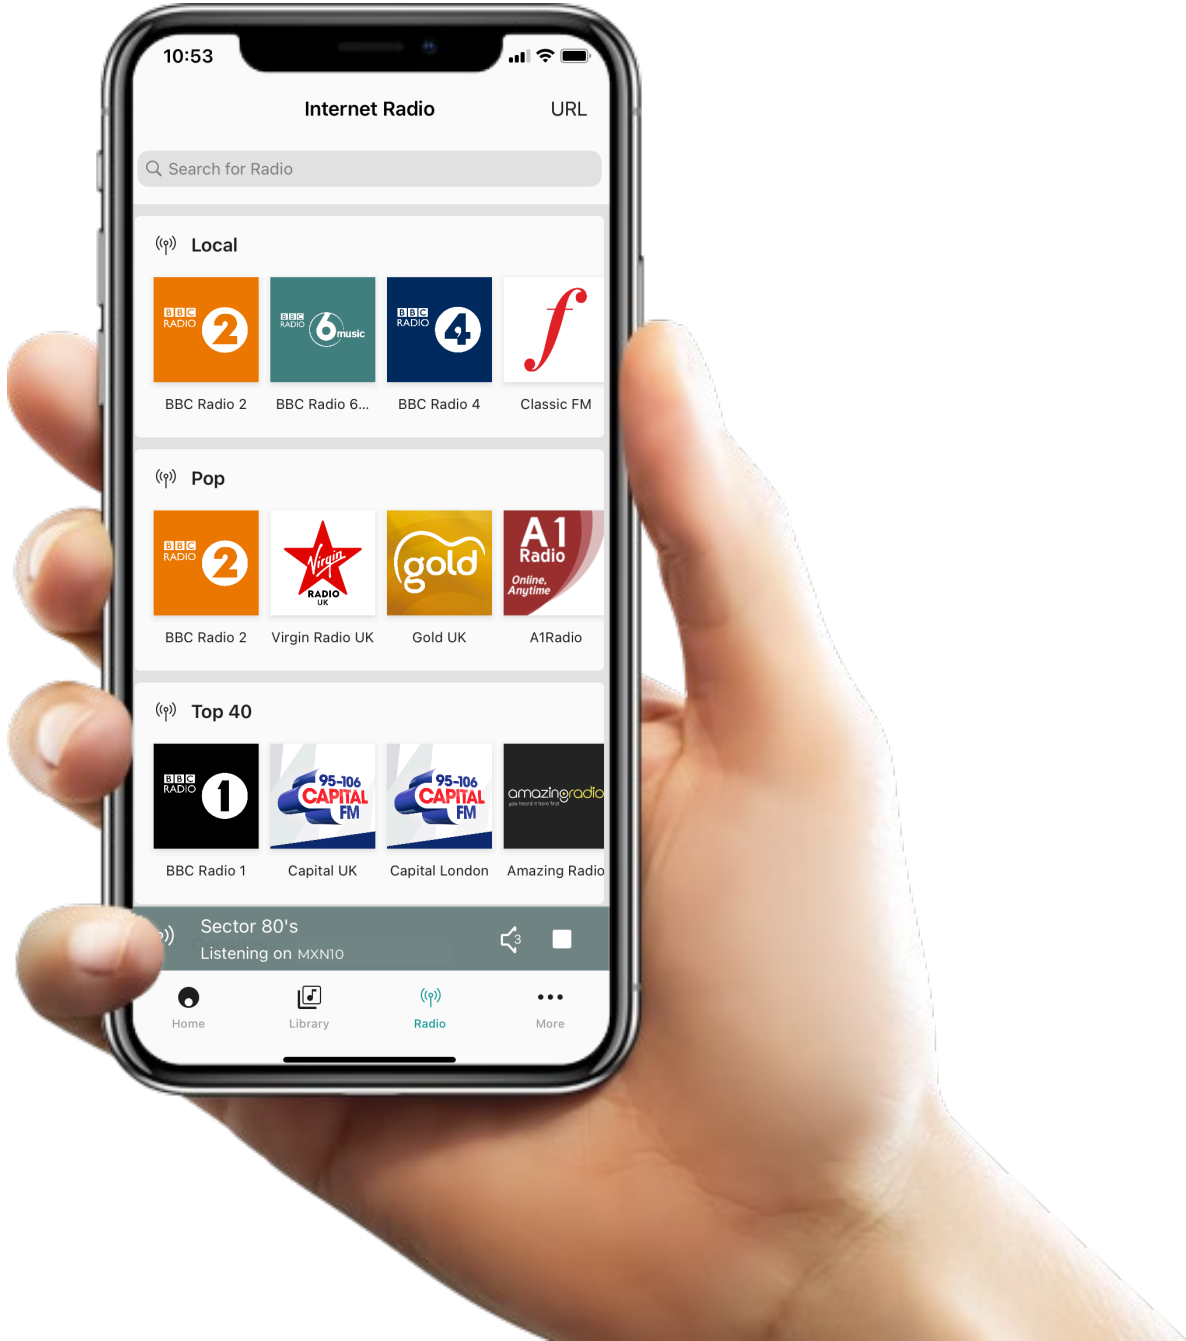
The convenience of streamed music was once let down by its sound quality and accessibility. That's no longer the case, thanks to faster broadband speeds, better CODECs, a wider range of services to choose from, and now because MXN10 brings our acclaimed StreamMagic streaming platform within reach of many more people.

Whatever you Want

MXN10 can access free and subscription Hi-Res streaming services, like internet radio, Spotify Connect, Tidal, Qobuz, and Deezer, all built-in for best sound quality. With Apple Airplay2 and Chromecast built-in, you can access Apple Music, BBC Sounds and more. MXN10 is also Roon Ready, so can consolidate your digital music listening, regardless of source, into a single magazine-style service.

Internet Radio, Live Transmission

It’s just like radio, only it comes over the internet rather than by airwaves. You can listen to your existing favourite broadcast stations, specialist internet only ones (like Soho Radio and NTS), alongside many more from around the world – all for free. Who knows what that indie show from New Zealand has instore for you? Plus, many stations are at a quality way beyond digital radio.



Pretty Astounding! After years of listening to Radio 3 on an outdated old DAB receiver the difference is amazing - crystal clear and a magnitude leap in quality.

StreamMagic Listener, UK

Made for Sharing

If a friend pops round who's not got the StreamMagic app, they can share their latest tunes with you via Bluetooth. Alternatively, if they've some exclusive Hi-Res FLAC files on USB stick, you can listen together on your hi-fi system simply by plugging the drive into MXN10's rear USB port.

Space Man

One of the challenges of being a music fan can be where to store your collection – another's the price of some of those re-mastered limited editions, with a handful of 'must-have' tracks. With the petite MXN10 you can get the best of both worlds: hear the music in incredible hi-res quality, and have no worries about where to squeeze another boxset in.

Complete Control

Interacting with MXN10 couldn’t be easier. Our StreamMagic app allows intuitive control of all connected sources – to curate playlists, set presets or browse albums conveniently from your mobile or tablet. Alternatively, there’s a handful of neat buttons on MXN10’s sleek fascia to give direct access to your favourite playlists or internet radio stations.

Wired for Sound

Spin MXN10 around and you'll notice the analogue RCA phono out, digital coax and optical out, USB in, plus a pair of wi-fi antennas for your network – or a LAN cable input if you prefer.

The analogue and digital outs also work simultaneously, meaning your hi-fi can also play nicely as a source in a multiroom set-up.

Designed for Life

MXN10 shares our signature Lunar Grey minimalist aluminium fascia, black steel cabinet and ‘floating’ base to create a sleek timeless look. The 215mm wide half-size cabinet matches our DacMagic200M and Alva Duo, it offers flexibility of placement and breathes new life into any hi-fi set-up. Thanks to over-the-air updates, MXN10 will also be streaming for many years to come.

Headline Features

MXN10
NETWORK PLAYER

- **StreamMagic Gen 4 Module** – swift playback & high-quality sound
- **ESS SABRE ES9033Q DAC** – for the latest streaming capabilities
- **High-quality Internet Radio** – thanks to MPEG-DASH support
- **Spotify Connect, TIDAL & Qobuz built in** – for the best possible sound
- **Roon Ready** – easy browsing of your digital music
- **Connectivity Choice** – USB playback, RCA/phono, coax & optical or wirelessly with Chromecast built-in, AirPlay 2 & Bluetooth 5.0

Controls & Indicators

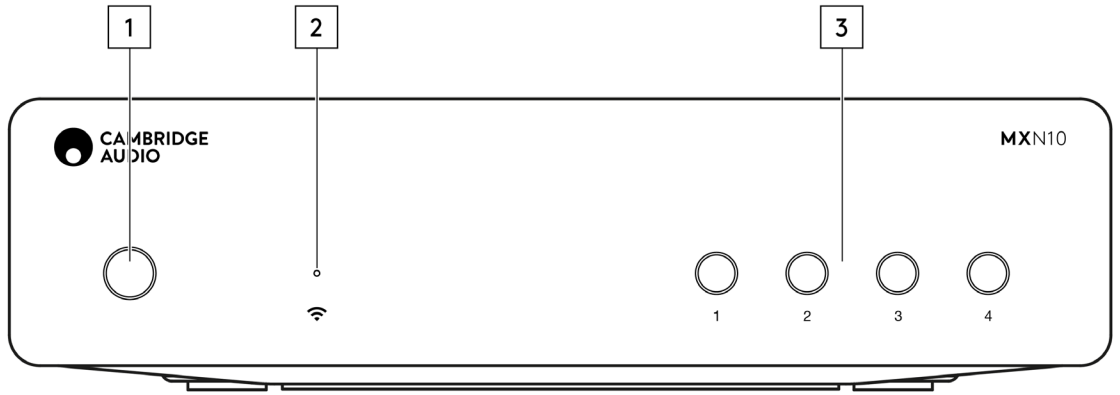
1. Power Button

Switches the unit between Standby Mode (indicated by dim power LED) and On (indicated by bright power LED). Standby Mode is a low power mode (0.5 Watts) – This can only be achieved when using Eco mode. The unit should be left in Standby Mode when not in use.

2. Network state LED

3. Preset Buttons

Used for internet radio modes. You can access 4 stored presets on the front panel preset buttons.



Connections

MXN10
NETWORK PLAYER

1. **Line Output**
2. **S/P DIF Coaxial Digital Output**
3. **2.4g & Bluetooth Antenna**
4. **TOSLINK Digital Output**
5. **Service Port**

   For servicing use only

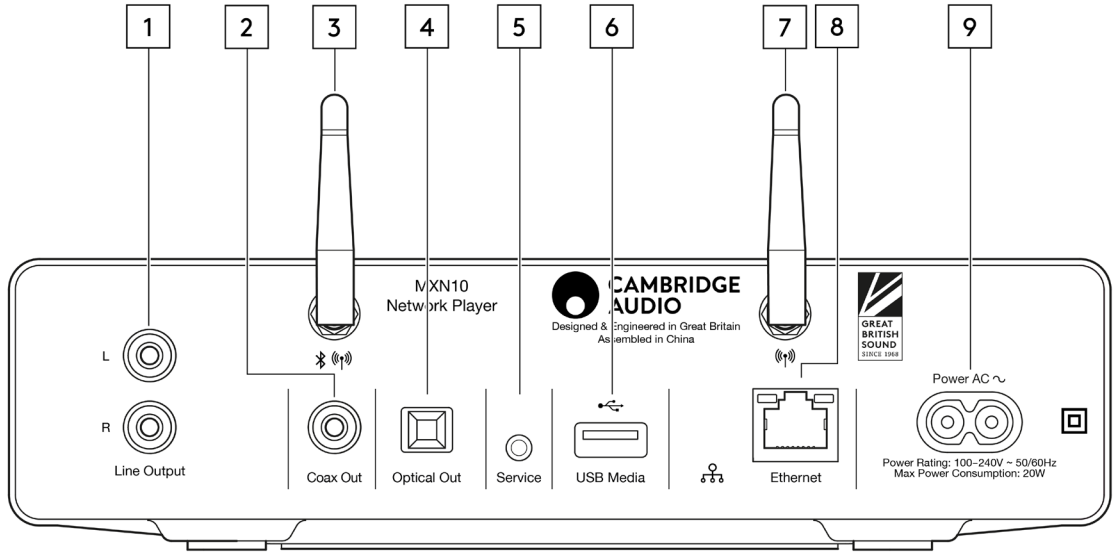
6. **USB Socket**

   Connection for USB HD/flash disk

7. **5g Antenna**
8. **Ethernet**

   Use to connect MXN10 directly to a router

9. **AC Power Socket**



Specifications

MXN10
NETWORK PLAYER
